

Press Release:

The K9 Guzzler dog drinking fountain from WESCO Fountains, Inc. to see new upgrades and improvements aimed at the Parks and Recreation market.

North Venice, Florida August 26, 2009

Always providing innovation to the water feature industry, WESCO Fountains, Inc. is following that tactic with the implementation of upgrades and improvements to its K9 Guzzler product line of commercial quality drinking fountains for dogs. The new improvements, while enhancing an already innovative product, will also produce a more durable and accessible product for our core consumer base, the Parks and Recreation market and Municipalities.

Improvements include the use of a new solid surface polymer material, that is more durable and resistant to weather, marks and scratches, and offered in wonderful "granite" designer colors. Also, in an effort to aid Municipalities with the most user friendly product for their parks, our unique self-shutoff valve is now compliant per the guidelines of the Americans with Disabilities Act.

These improvements further WESCO's commitment to the K9 Guzzler product line, but also reaffirm our idea of an "Affordable Dog Fountain Solution." As such, all improvements have been made directly to the current product line, and not as an "upgrade," and pricing will stay the same.*

To find all information please visit www.K9Guzzler.com or call 1-800-736-2072.

**Shipping charges will now apply.*
