

Press Release:

WESCO Fountains, Inc. announces the introduction of the K9 Guzzler commercial dog fountain, an affordable entry into the “Pet Friendly” market.

North Venice, Florida January 27, 2009

An Affordable Dog Fountain Solution . . . is the goal of the K9 Guzzler commercial dog fountain, a simple and attractive new product from WESCO Fountains, Inc. The K9 Guzzler is an excellent option for any outdoor pet fountain need. Designed to be durable and easy to install, this fountain provides an excellent and cost effective solution.

The fountain features a convenient auto-shut off valve that fills a self draining bowl. A twist of the knob provides clean, fresh water for pets to enjoy, and the bowl slowly drains itself to leave no standing water. Installation, for both “hard” and “earth” surfaces is easy as well. Mount the pre-assembled base, connect the water supply and attach the pre-assembled upright. Its durability is evident throughout. Molded in Fiber Reinforced Plastic, coupled with stainless steel and chrome plated brass components, the K9 Guzzler provides for a strong, weather resistant dog fountain that will last for years.

The K9 Guzzler commercial dog fountain is available now. To find all information and to order, visit www.K9Guzzler.com or call 1-800-736-2072 during normal business hours.

WESCO Fountains, Inc. is headquartered in North Venice, Florida and was founded in 1983. A leader in the water feature industry, WESCO has always delivered innovative products and solutions for their clients and customer service is the paramount goal.
